# In-Home Delivery

No more need to stay at home and wait for parcel deliveries.  
The parcel will be delivered inside your home, without you being present.

[See what our Peace of Mind series offers](#) →

No more need to stay at home and wait for parcel deliveries. The parcel will be delivered inside your home, without you being present. The app will send you push notifications telling you what's going on.

End-users can subscribe for In-home-delivery services. The service provider offers services performed by professional partners in his partner network. End-users can order everything from housecleaning and shirt wash to gardening and handyman services.

The service personnel are allocated a unique access code and all activities are monitored by the Alarm Receiving Centre. In this way the home owner will know that all deliveries are executed under secure conditions and following terms of agreement.

Our Smart Living Services includes keyless access to the home. Our gateway enables consumers to allocate access codes to family members or others. Home owners have full control from wherever they are with the use of one single App

Groceries, Parcel Services, Handyman Services, Cleaning Services, Manned Security delivered over your doorstep without you having to be at home or worry about the security.
