Peace of Mind

Here you will find the list of products that provide you with smart home solutions, simplifying your daily life without compromise on security.

[See what our Peace of Mind series offer](#) →

We safeguard your home, your family and your valuables 24/7. We also provide you with smart home solutions, simplifying your daily life. Through one single app you can administrate your home, give access to others and have in-home delivery services conducted under safe and secure conditions in your home. We offer you Peace of mind.

Safety-on-Board

Safe4 has developed smart IoT products for the Onesti portfolio, adding a dimension of Security to their smartness. Our Peace-of-Mind products all have safety-on-board embedded, understating that our focus is to ensure the safety and well-being of families and contributing to a more carefree living for end-users.

All Peace-of-mind products can be added to your Home alarm system with monitoring services from a certified Alarm Receiving Centre. Our Peace of Mind products can also be purchased as white label products

Convenience alerts

For instance, the RELAX plug is a smart plug that not only can be switched on an off remotely, it also has the built-in capacity of sending push notifications in your app if there is a power failure or if a connected appliance is mal-functioning – like for instance your fridge.

Also, a frost alarm will alert you if the home temperature for some reason falls to a level that can cause frozen pipes and expensive water leaks. If you yourself are not able to take action, the Alarm operator at the ARC will make sure that a security guard or a service person can re-establish your pre-defined environment.

The same goes for an alert from the connected humidity alarm. With this installed you achieve peace of mind knowing that you will be warned if the humidity sensor indicates that something is wrong.
